About WOW TRK

WOW TRK started in 2007 as a CPL affiliate network focusing on the UK and Australian markets due to a lack of competition. Over the years the network expanded and grew to cater to more than 13,000 active affiliates. As the platform grew WOW TRK became a resource for Affiliates learning about affiliate marketing through its blog, offer directory and online training guides.

In 2020 we made the decision to move away from operating an affiliate network due to the amount of competition now in the space and focus on being a resource for affiliate marketers. The WOW TRK website already receives highly engaged relevant traffic organically thanks to its quality content.

WOW TRK now offers a way for users to discover new affiliate networks and programs. Users can easily compare rates across offers and find new offers to run with its unique Offer Engine. On top of this WOW TRK has a ton of other useful resources for affiliates including an Affiliate Events directory, Learning Center and a blog covering news & affiliate tips.

Affiliate Networks & Programs Directory

200+ PROGRAMS LISTED

Affiliate networks and programs can list their business for free* within the WOW TRK Networks directory. Networks and programs get the opportunity to sell themselves by providing a detailed description about their service and can include additional information about their network for example what types of campaigns they run and what payment terms they offer affiliates.

Affiliates can quickly discover networks and programs by using the search box or the filter options. The filter options let them get really specific with the type of networks and programs they are looking for.

Networks and programs can further standard out in the directory from other programs by purchasing a featured listing or Ad space across the site.

Site Demographics

WOW TRK was a global affiliate network with traffic from more than 90 countries, we expect that to only grow over the next year with the changes to the WOW TRK website.

As you can see from the demographics to the right, in terms of existing traffic, the majority of our traffic comes from Asia and Europe. Specifically though, two key countries for us at WOW TRK were the UK and Australian markets so we have a strong audience already in these markets.

Our platform is designed to work well across all devices, over the past couple of years we have seen a shift in usage from desktop to mobile. With being a B2B platform this has been a slower shift than consumer focused services.

All these stats are before the launch of the new WOW TRK service, once we have collected enough data we will update the Media Kit to provide further stats and insights specific to the new site.
